 <https://calgara.github.io>

March 5, 2019

# Teaching Agenda

- ① What Models Explain Partisanship?
- ② What Effects does Partisanship Exert?
- ③ Does Partisanship Change?
- ④ Relationship between Ideology & Partisanship?

# Where does Partisanship Come From?

## Motivating Question

Where do you think a person's partisan preference (i.e, their partisan identification) comes from? What do you think the role of partisanship is in American political life?

# Situating Role of *Parties* in the Political System

## Political Parties and Problems of Collective Action

Arena:	Collective Action Problems	Parties Help Solve by:
Electorate	<p>Free riding</p> <ul style="list-style-type: none"><li>• Rational abstention</li><li>• Rational ignorance</li></ul>	<p>Branding</p> <ul style="list-style-type: none"><li>• Focus of collective responsibility</li><li>• Heuristic; party id.</li></ul> <p>Mobilization</p>
Organization	<ul style="list-style-type: none"><li>• Coordination of politicians' ambition</li><li>• Getting elected to office</li></ul>	<ul style="list-style-type: none"><li>• Nomination (agenda setting)</li><li>• Mobilization</li><li>• Fundraising</li></ul>
Government	<ul style="list-style-type: none"><li>• Transaction costs for making policy.</li><li>• Coalition maintenance</li></ul>	<p>“Long” coalition; ready-made support for party policy.</p> <ul style="list-style-type: none"><li>• Agenda control and the problem of cycling.</li><li>• Imagine a President Perot or Bloomberg...or Trump?</li></ul>

# Cutting Information Costs with Political Heuristics

## *Models of Electoral Control*

<b>Heuristic</b>	<b>Vote-Choice Model</b>	<b>Implications for Representatives</b>	<b>Analytical Purposes</b>
Ideology	Spatial/Proximity Voting	Responsive to Median Voter	Representation & Candidate Positioning
Partisanship	Michigan Model	Responsive to Partisan Base	Explaining vote choice/partisan bias
Valence	Retrospective Model/Valence Rule	Develop reputation, (honesty/integrity), monitor economy	Explaining electoral outcomes, pres. forecasting

*Note: Partisanship & ideology are generally prospective models.*

# Differing Models of Partisanship

## ***Socialization Models of Partisanship***

- ▶ Columbia Researchers of 1940s suggested that electoral choices based on upon strong “brand loyalties” rooted in religion and social class and reinforced by face- to-face interactions with like-minded acquaintances
- ▶ *American Voter* team at the University Michigan extrapolate on the model: “attitudes toward the objects of politics, varying through time, can explain short-term fluctuations in partisan division of the vote, whereas party loyalties and social characteristics, which are relatively inert through time, account but poorly for these shifts.”
- ▶ Model predicated on *durability* of partisanship... why do you think partisanship may be a “durable” political concept?

# Differing Models of Partisanship

## ***Socialization Models of Partisanship***

- ▶ Columbia Researchers of 1940s suggested that electoral choices based on upon strong “brand loyalties” rooted in religion and social class and reinforced by face- to-face interactions with like-minded acquaintances
- ▶ *American Voter* team at the University Michigan extrapolate on the model: “attitudes toward the objects of politics, varying through time, can explain short-term fluctuations in partisan division of the vote, whereas party loyalties and social characteristics, which are relatively inert through time, account but poorly for these shifts.”
- ▶ Model predicated on *durability* of partisanship... why do you think partisanship may be a “durable” political concept?

- ▶ Model predicated on *durability* of partisanship... why do you think partisanship may be a “durable” political concept?

# Michigan Model of Partisanship

## “MICHIGAN MODEL” OF VOTING CHOICE

- ▶ “The first & perhaps most important political heuristic is relying on a candidate’s party affiliation.” (Lau & Redlawsk)
- ▶ Partisanship influenced by socialization, resources, & ideology
- ▶ Important heuristic for voting, valence evaluations (economy, candidates) & issue opinions

## Implications of the Michigan Model: PID as *Identity*

- ▶ “A social identity involves a subjective sense of belonging to a group, which is internalized to varying degrees, resulting in individual differences in identity strength, a desire to positively distinguish the group from others, and the development of in-group bias.” (Tajfel, 1981)
- ▶ Key emphasis on this need among group members “to differentiate their own groups positively from others to achieve a positive social identity”
- ▶ Fundamental *internalize* sense of partisan identity given certain considerations... what social identities do you think is rooted in partisan identity?

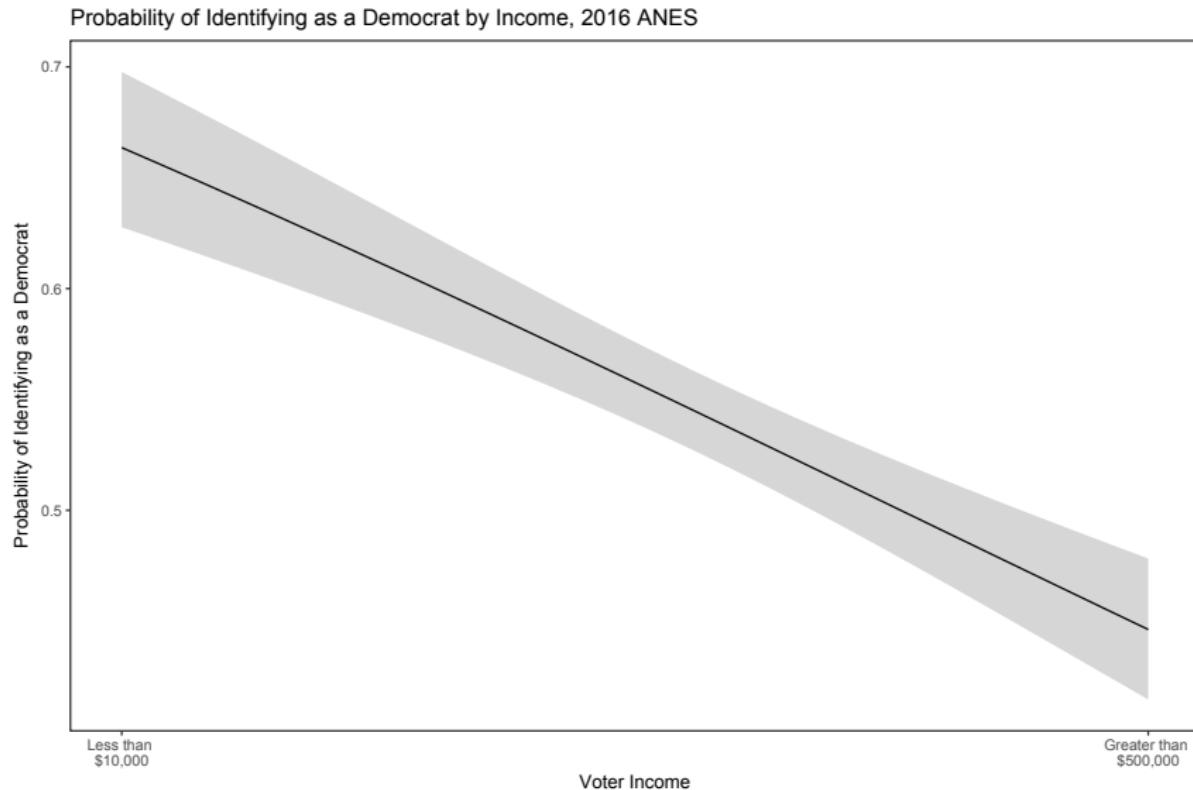

## Implications of the Michigan Model: PID as *Identity*

- ▶ “A social identity involves a subjective sense of belonging to a group, which is internalized to varying degrees, resulting in individual differences in identity strength, a desire to positively distinguish the group from others, and the development of in-group bias.” (Tajfel, 1981)
- ▶ Key emphasis on this need among group members “to differentiate their own groups positively from others to achieve a positive social identity”

Linear Prediction of Positive Feelings Toward Trump by Partisanship, 2016 ANES

# Special Case: Nixon Impeachment

Probability of Approving of Impeachment Action against President Nixon by Partisanship, 1974

Probabilities estimated from bivariate logistic regression model. Confidence intervals estimated with Huber-White Robust standard errors.

# The Case of the American Whites: Zingher 2018

- ▶ What does Zingher argue are the mechanisms causing the shift in support for the Democratic Party among whites?
- ▶ Two Key Mechanisms:
  - *Ideological Sorting:* Key loses among white conservatives as partisanship, voting behavior, & policy orientations have strengthened
  - *Demographic Changes:* Growth of liberal minority populations shifted median position on economic issues, to the detriment of the Democratic Party
- ▶ Why would changing & growing coalitions with the parties change issue positions?
- ▶ Evidence of a more liberal Democratic Party & more conservative Republican Party?

# The Case of the American Whites: Zingher 2018

- ▶ What does Zingher argue are the mechanisms causing the shift in support for the Democratic Party among whites?
- ▶ Two Key Mechanisms:

Data: American National Election Study (ANES)

# Changing Partisan Intensities

Intensity of Partisan Preferences in the American Electorate, 1972-2016

## Partisanship or Ideology? Barber & Pope Study

- ▶ Why would scholars be concerned about disentangling partisan & ideological preferences?
- ▶ As Barber & Pope articulate: “Another way of putting this question of party versus ideology is to ask how sincerely held are expressed political and policy opinions and are these opinions based on ideological convictions or group loyalty? If issue positions are deeply held, then people’s views on those issues should be far less likely to move as a result of any stimuli.”
- ▶ Why would Trump provide a unique opportunity to disentangle partisanship & ideology?
- ▶ Unconventional politician with unorthodox policy views... shifting partisan loyalties. Example of unorthodox policy view held by Trump?

## Partisanship or Ideology? Barber & Pope Study

- ▶ Why would scholars be concerned about disentangling partisan & ideological preferences?

# Does Party Trump Ideology?

- ▶ 10 policy issues... Example: To increase the minimum wage to over \$10 an hour. Do you support or oppose increasing the minimum wage to over \$10 an hour?
- ▶ *Treatment Effects:*
  - Trump supports the minimum wage increase
  - Trump opposes the minimum wage increase
  - Congressional Republicans support the minimum wage increase
  - Congressional Republicans oppose the minimum wage increase
  - *No issue cue*

# Does Party Trump Ideology?

- ▶ 10 policy issues... Example: To increase the minimum wage to over \$10 an hour. Do you support or oppose increasing the minimum wage to over \$10 an hour?
- ▶ ***Treatment Effects:***
  - ① Trump supports the minimum wage increase
  - ② Trump opposes the minimum wage increase
  - ③ Congressional Republicans **support** the minimum wage increase
  - ④ Congressional Republicans **oppose** the minimum wage increase
  - ⑤ *No issue cue*

# Does Party Trump Ideology?

**FIGURE 1. Average Treatment Effect Across Issues**

*Note:* The effects indicate the average movement within groups and by treatment condition. Republicans are the only group that seems to shift positions significantly, and only in relation to Donald Trump cues. But it is true that they react in both a liberal and a conservative direction depending upon the cue.

**FIGURE 2. Average Treatment Effect by Political Knowledge**

**Note:** This figure displays the estimated treatment effect by levels of political knowledge. The left panel shows the effects of the liberal Trump treatment across levels of political knowledge. Higher values indicate a movement in a more liberal direction. The right panel shows the effects of the conservative Trump treatment across levels of political knowledge. Lower values indicate movement in a more conservative direction. Knowledge is clearly correlated with the treatment effect—higher knowledge respondents are less likely to respond to the cue, in either direction.

## Key Points

- ① Parties help solve collective action problems by providing the basis of *collective accountability* and *strong branding* as a key electoral heuristic
- ② Major models of partisanship underpinned by *social identity* and loyalty to the party brand
- ③ Socialization reinforces partisanship... group identities are strong predictors of partisan preference
  - ▶ Contemporary politics defined by explanatory power of partisanship on voting behavior & evaluations
- ④ Partisanship *durable* and more intense, but changes slowly... see post-war change in Democratic partisanship among white southerners
- ⑤ Evidence that partisanship trumps ideological preferences—evidence from Barber & Pope
